 - Visualization – Charts
 - Dashboard
- Discussion
 - Findings & Implications
- Conclusion
- Appendix

EXECUTIVE SUMMARY

- **Executive Summary**
- This project analyzes the 2024 Stack Overflow Developer Survey data.
- The goal is to identify current and future technology trends among developers.
- Tools used include Excel, Python, and Google Looker Studio for data visualization.
- The dashboard presents insights on languages, databases, frameworks, and demographics.
- Findings highlight Python and PostgreSQL as leading technologies with growing future demand.

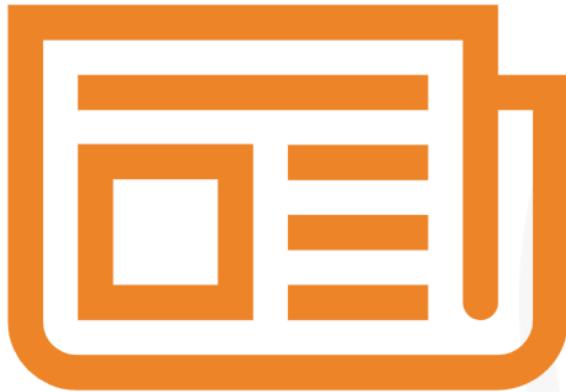

INTRODUCTION

- **Introduction**
- The technology landscape evolves rapidly; developers adapt by learning new tools and languages.
- This project provides insights into technology usage and future preferences among developers.
- The analysis supports recruiters, managers, and learners in understanding market trends.
- The results help identify which technologies are becoming dominant and which are emerging.

METHODOLOGY

- **Dataset:** Stack Overflow Developer Survey 2024 (modified subset).
- **Data Source:** Provided via IBM Skills Network repository.
- **Tools Used:** Google Looker Studio for visualization, Excel for cleaning.
- **Steps Taken:**
 - Data cleaning and filtering null values.
 - Creating calculated fields for frequency and ranking.
 - Designing interactive dashboards with filters and visuals.

RESULTS

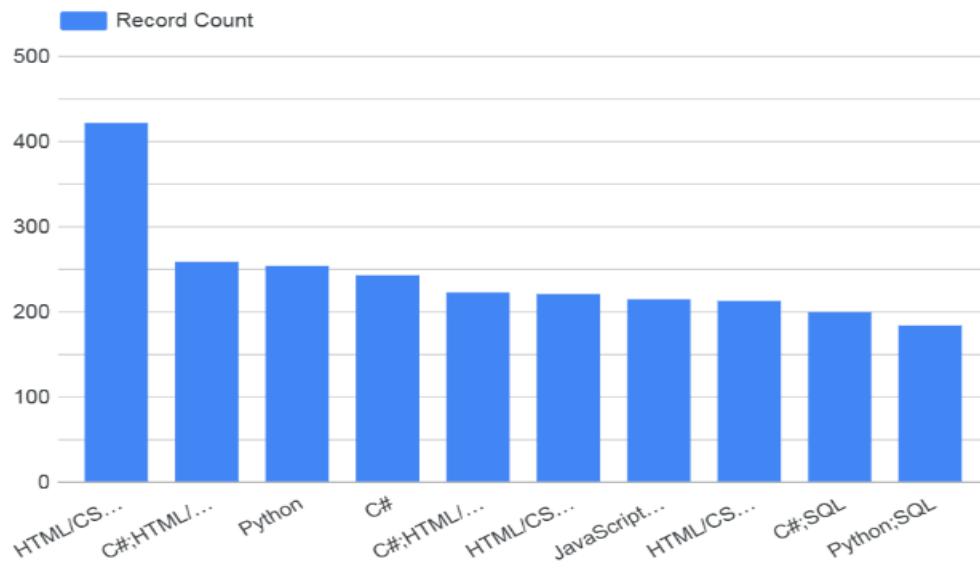

Skills Network

PROGRAMMING LANGUAGE TRENDS

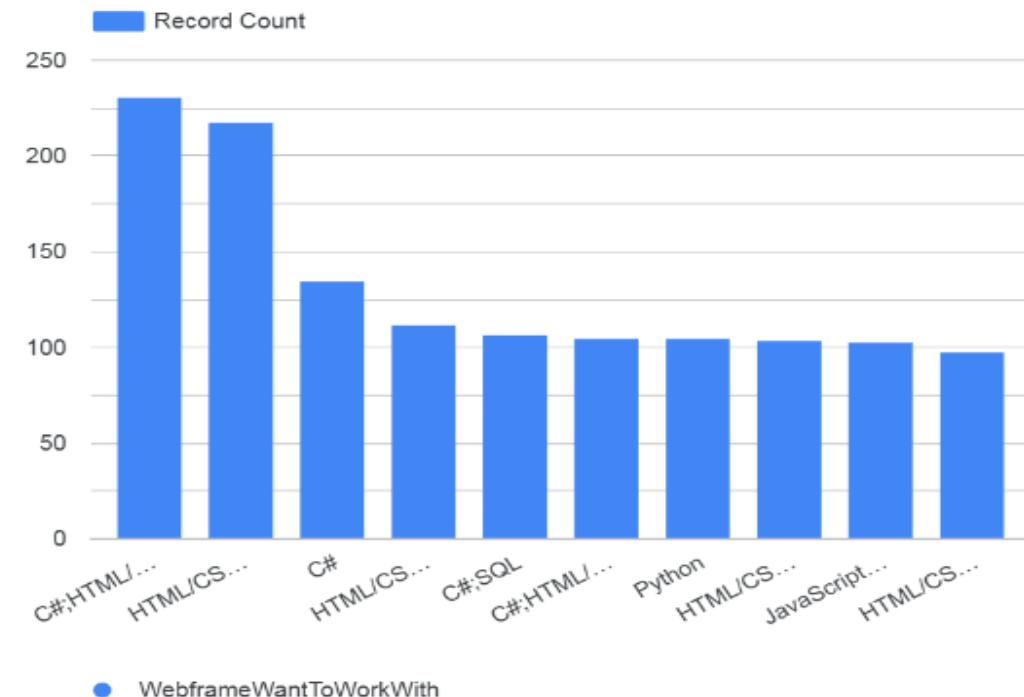

Current Year

<Bar chart of top 10 programming languages for the current year goes here.>

Next Year

< Bar chart of top 10 programming languages for the next year goes here.>

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

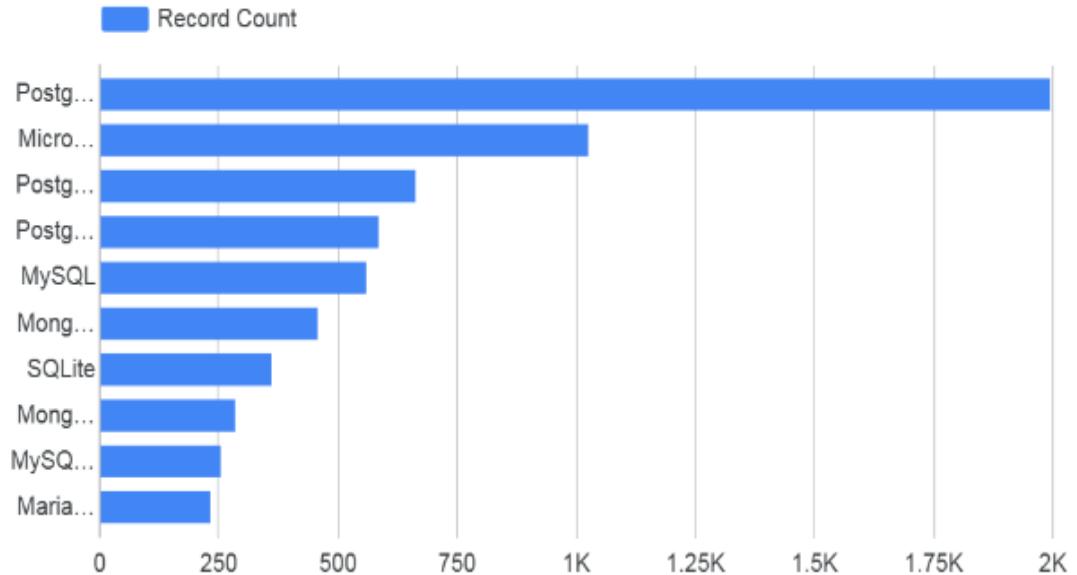

- **Findings:**
- Python remains the most widely used and desired language.
- Emerging languages like Rust and Go show increased interest.
- Legacy languages like PHP and C are declining in demand.
- **Implications:**
- Developers should invest in learning Python and modern backend languages.
- Companies can focus on supporting cross-platform and efficient tools.
- Educational institutions should emphasize trending languages in curricula.

DATABASE TRENDS

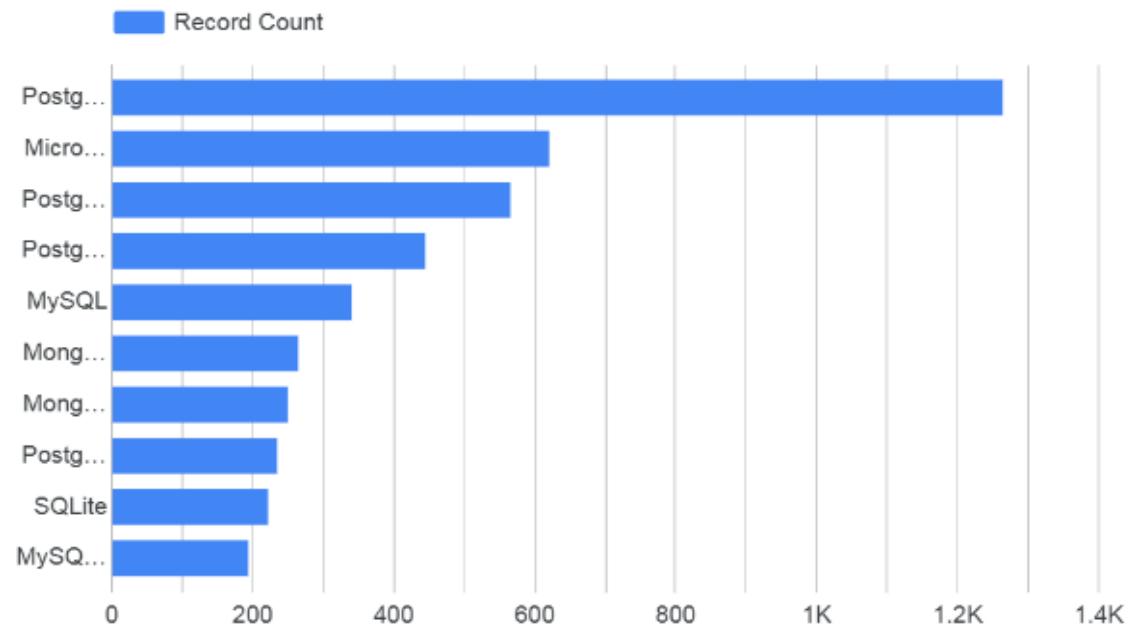

Current Year

< Bar chart of top 10 databases for the current year goes here >

Next Year

< Bar chart of top 10 databases for the next year goes here. >

DATABASE TRENDS - FINDINGS & IMPLICATIONS

- **Findings:**
 - SQL-based databases remain dominant.
 - NoSQL options like MongoDB and Firebase are gaining traction.
 - Cloud-hosted solutions are rising due to scalability needs.
- **Implications:**
 - Professionals should understand both SQL and NoSQL systems.
 - Organizations can optimize database infrastructure for flexibility and growth.
 - Increased focus on data engineering and storage optimization skills.

DASHBOARD

DASHBOARD TAB 1

2.42 MB

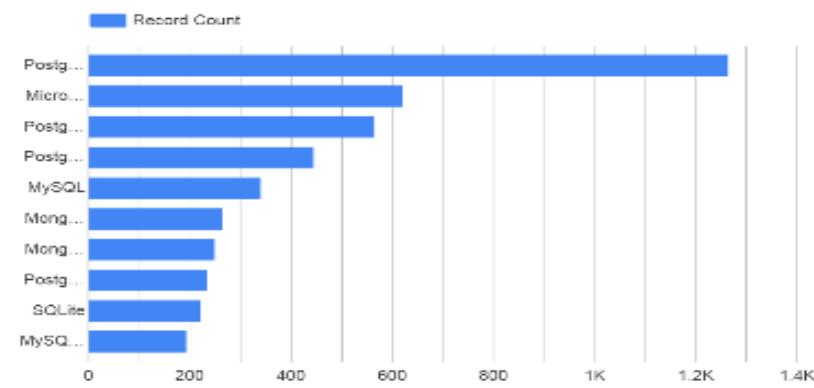

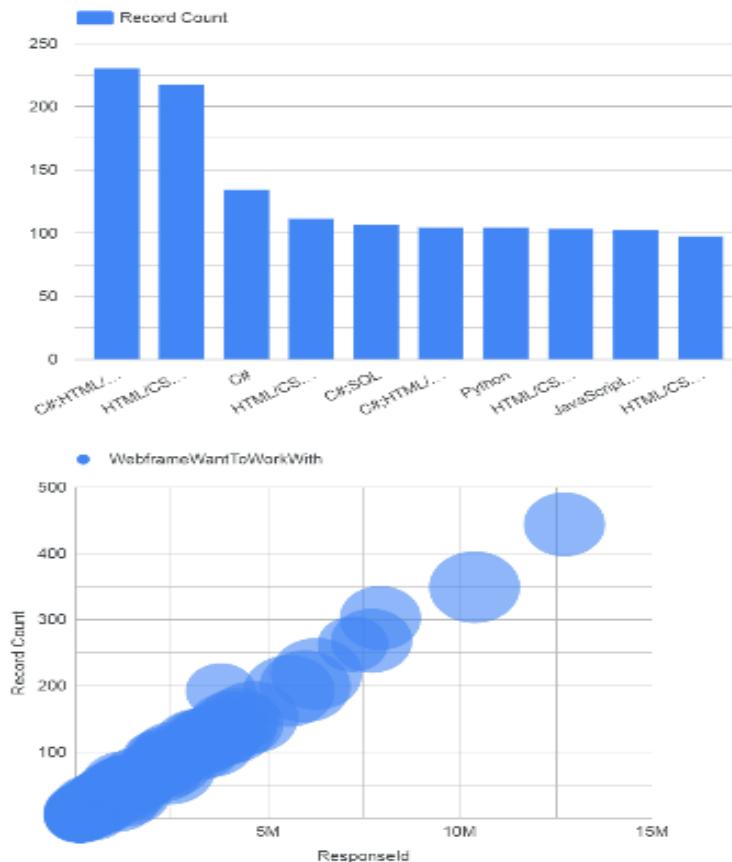

🧠 Current Technology Usage (2024 Stack Overflow Survey)

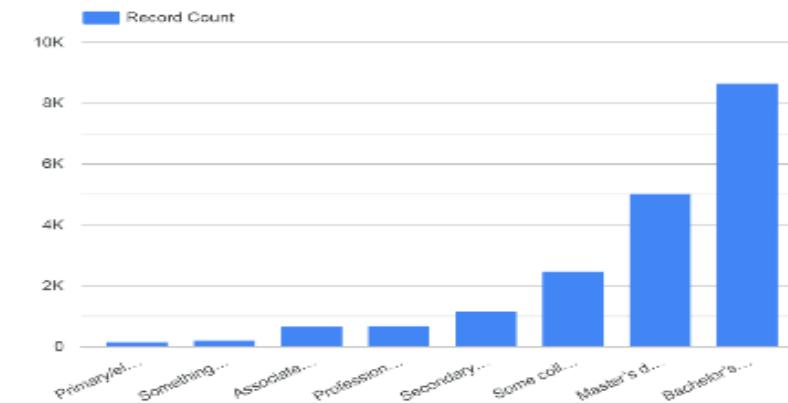

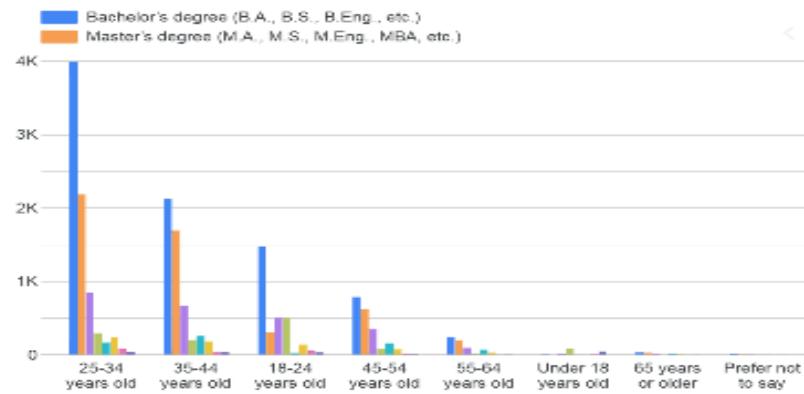

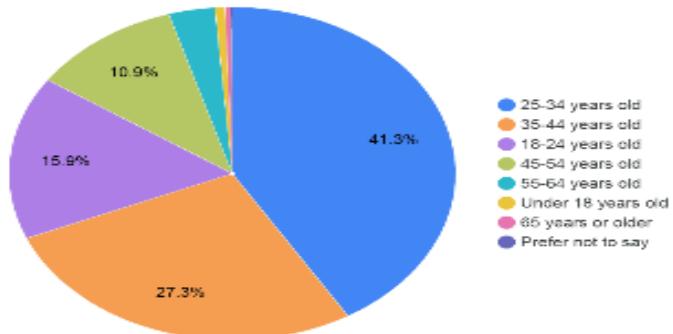

DASHBOARD TAB 2

Future Technology Trends

DASHBOARD TAB 3

Demographics

DISCUSSION

- Developers prioritize languages that enhance automation, data handling, and scalability.
- Python's broad applicability continues to attract professionals.
- Education and age correlate with technology adoption and specialization.
- Web development and data-related technologies show cross-functional demand.

OVERALL FINDINGS & IMPLICATIONS

FINDINGS

- Python and PostgreSQL dominate both current and future demand.
- Cloud and data analytics tools continue to expand.
- Emerging languages like Go and Rust indicate future skill trends.

- The job market favors full-stack and data-focused developers.
- Organizations investing in open-source technologies gain flexibility.
- Upskilling in new languages is essential for career advancement.

CONCLUSION

- The 2024 Stack Overflow data reveals ongoing dominance of Python and SQL.
- Developers are shifting toward cloud-based and modern frameworks.
- Data-driven and automation technologies are shaping the industry's future.
- Continuous learning and adaptability remain key to professional success.

APPENDIX

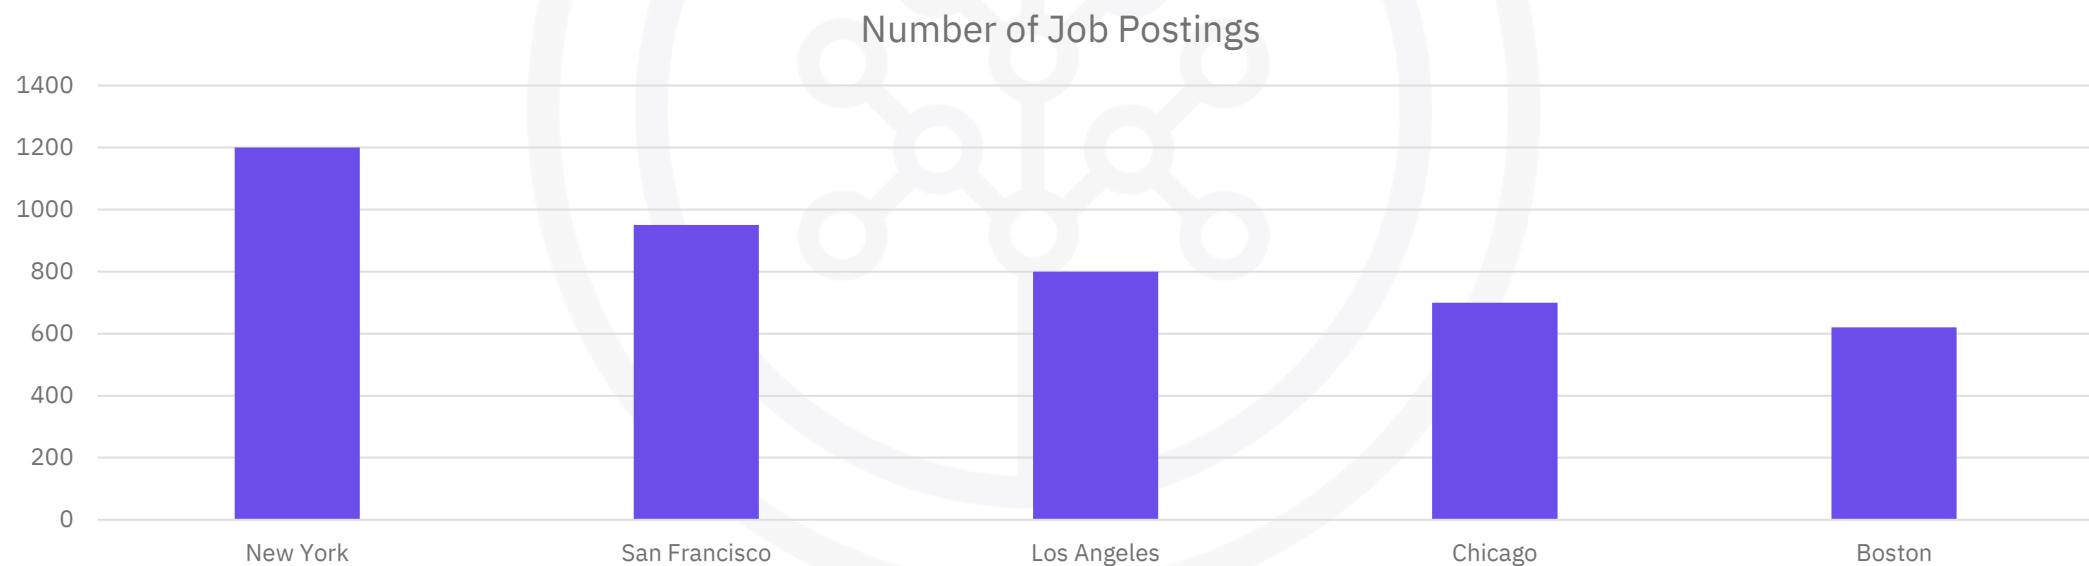

- Include any relevant additional charts, or tables that you may have created during the analysis phase.

JOB POSTINGS

In Module 1 you have collected the job posting data using Job API in a file named “job-postings.xlsx”. Present that data using a bar chart here. Order the bar chart in the descending order of the number of job postings.

POPULAR LANGUAGES

In Module 1 you have collected the job postings data using web scraping in a file named “popular-languages.csv”. Present that data using a bar chart here. Order the bar chart in the descending order of salary.
